Kasun Rasinidhu

IT UNDERGRADUATE

ABOUT ME

An enthusiastic and dependable undergraduate with interest in software engineering. Possesses knowledge of programming to a certain extent with problem-solving skills; always ready to enhance knowledge in this domain. Ready to learn more technologies with enhanced skill sets in the professional sphere.

EDUCATION

B.Sc. (Hons) in IT - University of Kelaniya 2025 - (Present)

Currently in Level 2

G.C.E Advanced Level - Prince of Wales' College 2021-2023

PROJECTS

TaskFlow – Task & Project Management System

Developed a web-based task and project management system using React, Node.js, Express.js, and MySQL. Implemented user authentication, project and task management, collaborator management, REST APIs, JWT authentication, and database operations. Gained practical experience in full-stack web development and API integration.

[GitHub link](#)

Weather App

Developed a native Android weather application that retrieves and displays real-time weather information through a RESTful API. Implemented API integration using HTTP GET requests, JSON response parsing, dynamic UI updates, and comprehensive error handling for invalid input, API failures, and network connectivity issues. Collaborated in a four-member development team using Git/GitHub and AI-assisted development workflows.

EXTRACURRICULAR

Graphic Designer : (IMSSA) University of Kelaniya

Designed posters, banners, and social media graphics for student events. Created visual content using design tools while following brand guidelines and deadlines. Improved creativity, attention to detail, and teamwork skills.
